PROFESSIONAL SUMMARY

Software Engineer and B.Tech graduate specializing in full-stack development with the MERN stack. Proficient in building scalable web architectures, integrating AI/ML models for real-time analytics, and optimizing database performance.

EDUCATION

Roorkee Institute of Technology <i>Bachelor of Technology in Computer Science</i>	2021 – 2025 Roorkee, India
St. Mary's School <i>Class XII — CBSE (PCM)</i>	2021 Saharanpur, India
St. Mary's Academy <i>Class X — CBSE</i>	2019 Saharanpur, India

PROJECTS

Pitch Your Startup (PYS) | *Next.js 14, TypeScript, Sanity, NextAuth*

- Engineered a production-ready platform using Next.js 14 and TypeScript, achieving full type safety.
- Integrated Sanity CMS with ISR, reducing data fetching latency by 40%.
- Implemented secure GitHub OAuth via NextAuth for authentication and access control.

Smart Traffic Management | *Python, OpenCV, YOLOv8*

- Developed a real-time traffic system using YOLOv8 for vehicle classification and density analysis.
- Enabled flexible lane configuration using polygon-based detection.
- Secured 1st place in university hackathon with optimized signal timing logic.

Twitter Architecture Clone | *React.js, Node.js, Express, MongoDB*

- Designed a scalable backend with JWT authentication and Bcrypt security.
- Built a real-time notification system using Socket.io.
- Implemented full CRUD operations with responsive UI.

ACHIEVEMENTS & LEADERSHIP

Winner — College Hackathon (2024): Built an AI-driven traffic solution.

Community Engagement: Analyze luxury watch market trends using data insights.

SKILLS

Languages: Python, JavaScript (ES6+), HTML/CSS, SQL, C

Frameworks: React.js, Next.js, Node.js, Express.js, Tailwind CSS

Tools & Concepts: MongoDB, Git/GitHub, REST APIs, JWT
